

Full-Name Index to The Green, Clayton and Related Families of Western Tennessee and Kentucky

Thomas G. Wallis

The full-name person index includes family members, in-laws, neighbors, etc. of the Green, Clayton and related families of western Tennessee and Kentucky. Information about an individual person may range from a single reference to multiple pages. Additionally, there are photos, obituaries, deed abstracts, marriage records, etc. for some individuals. The interested researcher is advised to consult the text.

The Henry County Archives staff are pleased to provide lookups.

Before using this index, please be aware of the following:

- The names are alphabetized by surname (i.e. “last name”). Surnames are shown in upper case font (e.g. SMITH).
- User beware: it is very likely some names are misspelled (incorrect spelling in the original document, poor penmanship, incorrect reading, typographical errors).
- Wherever possible, females are listed under their maiden names. Married names, if known, are shown in parenthesis after the maiden name. In most cases, cross-references are provided for the married names.
- When a married woman’s maiden name is not known, she is listed by her married name, with “Mrs.” following her given name(s).
- User beware: in some cases it was not known if a female’s surname was her maiden name or married name.
- An attempt was made to include all references to an individual in a single listing, regardless of the varied ways that person’s name is shown in the text.
- At times similar names could not be clearly associated with a particular individual; in such cases separate entries were made in the index (although both may indeed be the same individual).
- Finally, different people may have the exact same name (e.g. John CLAYTON), resulting in more than one listing for that name.

Although this author has striven to be accurate, errors in indexing likely occurred. He apologizes for any problems this may inadvertently cause.
